

Borrowing eBooks with the iPad

To get started, you need to know Two things:

1. Your Apple ID and password, to download the OverDrive app.
2. Your library card number and pin (usually the last four numbers of your home phone number) to check out books.

If you are in the library log in to the library's wifi. To do this, go to your iPad's "Settings" and then "Wi-Fi." Choose **Crowell Public Library**. On the next screen, click in the box to accept the terms of service.

Return to the main screen of the iPad, **click** on the App Store. Search for the free **OverDrive app** and download it.

Open the **OverDrive** app. Choose a Library. Type in "Crowell." That will lead you to our consortium, **Southern California Digital library**. We share our database with 16 other libraries.

Click on "**Login**" on the right side of the page. Then select **Crowell Public Library** from the pull- down menu. On the next screen, enter your library card number with no spaces and your pin (last 4 digits of phone number).

Press the **Browse or Search** button to select a title.

There are two basic types of e-books: Kindle format and everything else, which are called EPUBS, which are used on Sony Readers and Nooks. Some EPUBS require an additional piece of software called Adobe Digital Editions. This is free and only needs to be installed once. OverDrive will let you know when and if you need it.

To read books in Kindle format, download the free **Kindle app** from the App Store.

Once you find a book, check it out and download it. The lending period is 21 days. You may check out 5 titles at any one time.
